Attorneys for Defendants

KELLY BROUGHTON; THE DEVELOPMENT SERVICES DEPARTMENT OF THE CITY OF SAN DIEGO; AFSANEH AHMADI; THE CITY OF SAN DIEGO

UNITED STATES DISTRICT COURT
SOUTHERN DISTRICT OF CALIFORNIA

I, Julio DeGuzman, declare as follows:

1. I am currently employed as an investigator in the Civil Division of the San Diego City Attorney's Office. I have held this position since August 2006

2. I make this declaration based upon my own personal knowledge, except as to those matters set forth in this declaration on information and belief, and as to those matters, I

111

111

1 believe them to be true. If called upon to testify as to those matters stated in this declaration, I
 2 could and would competently testify to those matters.

3 3. My duties as an investigator include conducting investigations involving lawsuits
 4 filed against the City of San Diego. These investigations include conducting background
 5 investigations on plaintiffs and all witnesses.

6 4. Prior to my employment with the City Attorney's Office, I was employed as a
 7 Special Agent with the United States Postal Service Office of Inspector General for seven years.
 8 As part of my duties as a special agent, I conducted criminal investigations on postal contractors,
 9 suspects who defrauded the Postal Service and postal employees involved in thefts,
 10 embezzlement and workers' compensation fraud.

11 5. Prior to working for the Postal Service, I was employed as a Special Agent with
 12 the Defense Criminal Investigative Service (DCIS), the investigative arm of the U.S. Department
 13 of Defense Office of Inspector General for six years. As part of my duties as a DCIS special
 14 agent, I conducted criminal investigations on defense contractors involved in defrauding the
 15 government via false statement/false claims, kickbacks, bribery, and public corruption. I also
 16 investigated healthcare providers who claimed they rendered medical services to
 17 Champus/Tricare military members and/or their dependents, when they did not.

18 6. Prior to working for the Department of Defense, I was employed as a Special
 19 Agent with the US Naval Criminal Investigative Service (NCIS) for 12 years. As part of my
 20 duties as a NCIS special agent, I conducted criminal investigations involving Navy contractors
 21 who allegedly committed fraud against the Navy by not providing the work or services specified
 22 in the Navy contract. The results of my investigations were presented to the United States
 23 Attorney's Office for criminal or civil prosecution or both.

24 7. I have investigated the circumstances surrounding the applications of Blackwater
 25 Lodge and Training Center, Inc., or related entities, and their agents for permits from the City of
 26 San Diego to use the facility at 7685 Siempre Viva Road in Otay Mesa ("the Otay Mesa
 27 facility"). On information and belief, Blackwater Lodge and Training Center, Inc. does business
 28 //

1 as "Blackwater Worldwide." For purposes of this declaration, I will simply refer to this entity as
2 "Blackwater."

3 8. All businesses operating in the City of San Diego are required to obtain a business
4 tax certificate. On their business tax certificate application, Blackwater indicated its primary
5 business activity at the Otay Mesa facility as follows: "Blackwater will conduct security training
6 for the United States Navy." Blackwater gave the following additional description of its business
7 activity at the site: "Blackwater has contracted with the United States Navy to conduct a course
8 called 'Ship Reactionary Force Basic' (SRF-B)." A true and correct copy of this business tax
9 certificate application is included at Exhibit A to my declaration.

10 9. On information and belief, Blackwater applied for building permits for the Otay
11 Mesa facility through its agents. The City's Development Services Department assigned three
12 project numbers to these applications: 138862; 140766; and 150059. At Exhibit B are true and
13 correct copies of these applications.

14 10. The first application (project # 138862) indicated that the Otay Mesa facility was a
15 "WEARHOUSE (sic) WITH OFFICES" and the listed proposed use was the "SAME (NO
16 CHANGE)." The listed project description was, "44 FEET OF PARTITIONS IN EXISTING
17 OFFICE SPACE."

18 11. The second application (project # 140766) listed a project description as follows,
19 "Scope of work to include: Install 2 new AC units, 6 Exhaust fans."

20 12. The amended second application (project # 140766) listed the existing use as a
21 "Commercial Warehouse" and failed to identify a proposed use. The project description listed
22 was "Electrical T.I" which I understand to mean electrical tenant improvement.

23 13. The third application (project # 150059) listed the existing use as a "Warehouse"
24 and proposed use as a "Training Facility." The listed project description was, "Add indoor firing
25 range."

26 14. The Hazardous Materials Questionnaires accompanying these project applications
27 did not identify any uses of explosives or blasting agents or other health hazards (such as use of
28 mace) associated with the intended uses of the facility.

1 15. Beginning on June 6, 2008, I conducted an Internet search of the United States
 2 Navy's ship reactionary force (hereinafter referred to as the "SRF") training program. At Exhibit
 3 C are true and correct copies of two website articles detailing the specifics of the SRF training
 4 program. The Internet addresses for these articles are as follows:

5 http://www.navy.mil/search/display.asp?story_id=30725 and

6 http://www.navy.mil/search/display.asp?story_id=37662.

7 16. The SRF is a Navy-wide program is a program which teaches all sailors who stand
 8 watch aboard ships in the field of counterterrorism. The Navy developed a need for this type of
 9 program after 17 sailors aboard the USS Cole were killed by terrorist bomb in a Yemeni port in
 10 2000. Sailors who complete this course receive certifications in the use of non-lethal weapons,
 11 defensive tactics and the employment of the baton, utilization of the oleoresin capsicum (OC)
 12 spray, and how to handle and shoot a 9 mm handgun, M-16 rifle and a shotgun. This program is
 13 being provided to sailors in San Diego, California, Norfolk, Virginia and soon in Great Lakes,
 14 Illinois.

15 17. There are 24 trainees per class and each class is three to four weeks long. Trainees
 16 wear heavy padding, and bat and punch each other as they learn basic strike tactics. The firing
 17 range is a 25-yard indoor firing range and trainees learn to wear sidearms safely while wriggling
 18 through ship hatches and up narrow ladders installed in white metal cargo containers stacked
 19 along one wall of the building to simulate a ship. Part of the training will include being
 20 sprayed with OC spray.

21 18. Trainers from Blackwater will administer classroom quizzes on distinguishing
 22 small boats carrying cargo such as fruit from those carrying bombs. Trainees also receive
 23 training in a mock warship area where shipping containers are outfitted with red lights inside to
 24 simulate an onboard emergency and speakers blare clanking background noise during exercises.

25 19. The Navy's own website substantiates much of this information regarding the SRF
 26 training program. See Exhibit D. These articles can also be found at the following web sites:

27 http://www.navy.mil/search/display.asp?story_id=22309; and

28 ///

1 https://www.fbo.gov/?s=opportunity&mode=form&id=57f2b4375d9c94266981ef54b2665708&tab=core&_cview=0.

2

3 20. On information and belief, Blackwater's has another pending building permit
4 application (project # 157613) on file with the City. The application seeks approval to add a
5 "simulator/ride" inside the warehouse. Exhibit E is a true and correct copy of DSD's computer
6 screen summary of the application. I have not yet been able to get a copy of the actual
7 application, but I will supplement
8 my declaration if I am able to.

9 21. From my investigation, I have reviewed the contract of May 27, 2008 between the
10 United States Navy and Blackwater. The total amount awarded to Blackwater for conducting the
11 SRF program is \$134,782.00. Based on information and my belief that the contract includes
12 sensitive proprietary information, I have not attached a copy of it to this declaration.

13 I declare under penalty of perjury under the laws of the United States that the above is true
14 and correct.

15 Executed this 9th day of June 2008, at San Diego, California.

Licensed Contractor's Declaration: I hereby affirm that I am licensed under provisions of Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code, and my license is in full force and effect.

Signature Title PRESIDENT Date 09/05/08

6. Workers' Compensation Declaration: I hereby affirm under penalty of perjury one of the following declarations:

a. I have and will maintain a certificate of consent to self-insure for workers' compensation as provided by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued.

b. I have and will maintain workers' compensation, as required by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued. My workers' compensation insurance carrier and policy number are:

Insurance Company HARTFORD Policy No. 76WEGPT96011 Expiration Date 03/15/08

This section need not be completed if the permit is for one hundred dollars (\$100) or less.

c. I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the Workers' Compensation Laws of California, and agree that if I should become subject to the workers' compensation provisions of Section 3700 of the Labor Code, I shall forthwith comply with those provisions

Signature Date 09/05/08

Warning: Failure to secure workers' compensation coverage is unlawful, and shall subject an employer to criminal penalties and civil fines up to one hundred thousand dollars (\$100,000), in addition to the cost of compensation, damages as provided for in Section 3706 of the Labor Code, interest, and attorney's fees.

Part II (Complete for building, plumbing, electrical, mechanical or sign permit)

7. Owner-Builder Declaration: I hereby affirm that I am exempt from the Contractor's License Law for the following reason (Sec. 7031.5. Business and Professions Code: Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, also requires the applicant for such permit to file a signed statement that he is licensed pursuant to the provisions of the Contractor's License Law (Chapter 9, commencing with Section 7000, of Division 3 of the Business and Professions Code) or that he is exempt therefrom, and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars (\$500):)

I, as owner of the property, or my employees with wages as their sole compensation, will do the work and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or through his own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he did not build or improve for the purpose of sale.).

I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and contracts for such projects with contractor(s) licensed pursuant to the Contractor's License Law).

I am exempt under Section _____ B.P.C. for this reason.

Signature _____ Date _____

8. Construction Lending Agency: I hereby affirm that there is a construction lending agency for the performance of the work for which this permit is issued (Sec. 3097, Civ. C). If the name of the lending agency is not known, the word "Unknown" should be written here.

Address **1117 SUTTER STREET SAN DIEGO CA 92103** City **CA** State **CA** Zip Code **92103** Telephone **619-278-0904**

Applicant's Signature: I certify that I have read this application and state that the above information is correct, and that I am the property owner, authorized agent of the property owner, or other person having a legal right, interest, or entitlement to the use of the property that is the subject of this application (Municipal Code Section 112.0102). I understand that the applicant is responsible for knowing and complying with the governing policies and regulations applicable to the proposed development or permit. The City is not liable for any damages or loss resulting from the actual or alleged failure to inform the applicant of any applicable laws or regulations, including before or during final inspections. City approval of a permit application, including all related plans and documents, is not a grant of approval to violate any applicable policy or regulation, nor does it constitute a waiver by the City to pursue any remedy which may be available to enforce and correct violations of the applicable policies and regulations.

Signature **** Date **09/05/08**

Important Instructions to Applicant

California State law requires every permit applicant to provide specific information and certain declarations regarding the proposed work. The following instructions describe who may sign the required declarations.

Licensed Contractor

This statement may be signed by the contractor or a corporate officer of a construction company including President, Vice President, Secretary, Treasurer, Trustee, Chairman of the Board or Responsible Managing Employee (RME). An agent for the contractor may sign only when a letter of authorization from the contractor authorizing the agent to sign is presented at permit issuance. The person signing must list his/her title.

Workers' Compensation Declaration

This statement may be signed by the contractor, owner, tenant, lessee or an authorized agent of one of these. A valid Certificate of Workers' Compensation Insurance must be presented at permit issuance. The certificate:

- Must show the name of the insured.
- Must list the policy number, effective date, and expiration date of the insurance policy.

If item 6.c. is checked, only the contractor or owner may sign this area, NOT AN AGENT. This section is signed only when the owner contractor will have no employees on the job. If, after signing the exemption from the Workers' Compensation provisions of the Labor Code, the contractor or owner-builder should become subject to

such provisions, they must forthwith comply. In the event they do not comply with the Workers' Compensation Law, the permit shall be deemed revoked.

Owner-Builder Declaration

This statement may be signed by the owner, lessee, tenant, architect, engineer, licensed pest control operator, or an authorized agent of any of these. In every case, a separate Owner-Builder Verification form (DS-3042) must also be signed by the owner.

Title: Southwest Law - Misc Permits

Scope: OTAY MESA - Mechanical permit with plans. Scope of work to include: Install 2 new AC units, 6 Exhaust fans. *** Electrical permit under seperate permit*** OMDD-INDUST-SUB CT:100.07 Geo:53

Added: TQTRAN 10/1/2007 11:11 AM

Updated: IVR 2/8/2008 02:57 PM

The screenshot shows the homepage of Noble Consultants, Inc. The header features the company logo 'NOBLE CONSULTANTS, INC.' in a black box. Below the header, there are links for 'FTP Sites', 'Corporate Profile', 'Projects', 'Key Staff', 'Employment Opportunities', 'Clients', and 'Contact Us'. A row of six small images shows various engineering projects: a construction site, a bridge, a building, a lighthouse, a bridge under construction, and a coastal area. The main content area is titled 'A Civil, Structural, Coastal & Harbor Engineering Firm'. It describes the company as a civil engineering firm specializing in coastal, structural, harbor, and water resources engineering. It highlights that all principals and staff have specialized during their entire careers in providing engineering services on marine projects, with principals having as much as 40 years of marine engineering experience. The text details the firm's general experience in siting, planning, surveying, permitting, design, and construction management of civil works. It lists specific project work tasks such as initial site investigations, field monitoring, data collection, hydrologic and coastal analyses, development of design criteria, and construction of hydrologic and coastal structures. The text concludes by stating that projects have been performed for government agencies, corporate industry, and private individuals along coastal shorelines, estuaries, bays, lagoons, reservoirs, lakes, rivers, and inland waterways throughout the United States and the world. To the right of the text is a large, dark, high-contrast image of a coastal or riverine scene.

5. Contractor Name (not required for development permits) Fax Number

Rowan Electric Address 2702 Loker Ave West City Carlsbad State CA Zip Code 92010 Telephone 760-692-0700

State License No. License Class City Business Tax No.

746-837 C-10 81000194

Licensed Contractor's Declaration: I hereby affirm that I am licensed under provisions of Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code, and my license is in full force and effect.

Signature _____ Title _____ N.P. Date 2-7-08

6. Workers' Compensation Declaration: I hereby affirm under penalty of perjury one of the following declarations:

- a. I have and will maintain a certificate of consent to self-insure for workers' compensation as provided by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued.
- b. I have and will maintain workers' compensation, as required by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued. My workers' compensation insurance carrier and policy number are:

Insurance Company Zenith Policy No. 2068142302 Expiration Date 3/1/08

(This section need not be completed if the permit is for one hundred dollars (\$100) or less.)

- c. I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the Workers' Compensation Laws of California, and I agree that if I should become subject to the workers' compensation provisions of Section 3700 of the Labor Code, I shall forthwith comply with those provisions.

Signature _____ Date 2-7-08

Warning: Failure to secure workers' compensation coverage is unlawful, and shall subject an employer to criminal penalties and civil fines up to one hundred thousand dollars (\$100,000), in addition to the cost of compensation, damages as provided for in Section 3708 of the Labor Code, interest, and attorney's fees.

7. Owner-Builder Declaration: I hereby affirm that I am exempt from the Contractor's License Law for the following reason (Sec. 7031.5, Business and Professions Code: Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, also requires the applicant for such permit to file a signed statement that he is licensed pursuant to the provisions of the Contractor's License Law (Chapter 9, commencing with Section 7000, of Division 3 of the Business and Professions Code) or that he is exempt therefrom, and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars (\$500):

- I, as owner of the property, or my employees with wages as their sole compensation, will do the work and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or through his own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he did not build or improve for the purpose of sale).
- I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and contracts for such projects with contractor(s) licensed pursuant to the Contractor's License Law).
- I am exempt under Section _____ B.P.C. for this reason.

Signature _____ Date _____

8. Construction Lending Agency: I hereby affirm that there is a construction lending agency for the performance of the work for which this permit is issued (Sec. 3097, Civ. C). If the name of the lending agency is not known, the word "unknown" should be written here.

Lender's Name: _____ Lender's Address: _____

11. Applicant Information: Property Owner Authorized Agent for Property Owner. Other Entitled Person

Name: _____

Fax Number

Address City State Zip Code Telephone

Applicant's Signature: I certify that I have read this application and state that the above information is correct, and that I am the property owner, authorized agent of the property owner, or other person having a legal right, interest, or entitlement to the use of the property that is the subject of this application (Municipal Code Section 112.0102). I understand that the applicant is responsible for knowing and complying with the governing policies and regulations applicable to the proposed development or permit. The City is not liable for any damages or loss resulting from the actual alleged failure to inform the applicant of any applicable laws or regulations, including before or during final inspections. City approval of a permit application, including all related plans and documents, is not a grant of approval to violate any applicable policy or regulation, nor does it constitute a waiver by the City to pursue any remedy which may be available to enforce and correct violations of the applicable policies and regulations.

Signature _____

Date 2-7-08

Important Instructions to Applicant

California State law requires every permit applicant to provide specific information and certain declarations regarding the proposed work. The following instructions describe who may sign the required declarations.

Licensed Contractor

This statement may be signed by the contractor or a corporate officer of a construction company including President, Vice President, Secretary, Treasurer, Trustee, Chairman of the Board or Responsible Managing Employee (RME). An agent for the contractor may sign only when a letter of authorization from the contractor authorizing the agent to sign is presented at permit issuance. The person signing must list his/her title.

Workers' Compensation Declaration

This statement may be signed by the contractor, owner, tenant, lessee or an authorized agent of one of these. A valid Certificate of Workers' Compensation Insurance must be presented at permit issuance. The certificate:

- Must show the name of the insured.
- Must list the policy number, effective date, and expiration date of the insurance policy.

If item 6.c is checked, only the contractor or owner may sign this area, NOT AN AGENT. This section is signed only when the owner or contractor will have no employees on the job. If, after signing the exemption from the Workers' Compensation provisions of the Labor Code, the contractor or owner-builder should become subject to

such provisions, they must forthwith comply. In the event they do not comply with the Workers' Compensation Law, the permit shall be deemed revoked.

Owner-Builder Declaration

This statement may be signed by the owner, lessee, tenant, architect, engineer, licensed pest control operator, or an authorized agent of any of these. In every case, a separate Owner-Builder Verification form (DS-S042) must also be signed by the owner.

---------	------	-------	----------	-----------

Applicant's Signature: I certify that I have read this application and state that the above information is correct, and that I am the property owner, authorized agent of the property owner, or other person having a legal right, interest, or entitlement to the use of the property that is the subject of this application (Municipal Code Section 1120102). I understand that the applicant is responsible for knowing and complying with the governing policies and regulations applicable to the proposed development or permit. The City is not liable for any damages or loss resulting from the actual or alleged failure to inform the applicant of any applicable laws or regulations, including before or during final inspections. City approval of a permit application, including all related plans and documents, is not a grant of approval to violate any applicable policy or regulation, nor does it constitute a waiver by the City to pursue any remedy which may be available to enforce and correct violations of the applicable policies and regulations.

Signature _____ Date: 2-7-08

Important Instructions to Applicant

California State law requires every permit applicant to provide specific information and certain declarations regarding the proposed work. The following instructions describe who may sign the required declarations.

Licensed Contractor

This statement may be signed by the contractor or a corporate officer of a construction company including President, Vice President, Secretary, Treasurer, Trustee, Chairman of the Board or Responsible Managing Employee (RME). An agent for the contractor may sign only when a letter of authorization from the contractor authorizing the agent to sign is presented at permit issuance. The person signing must list his/her title.

Workers' Compensation Declaration

This statement may be signed by the contractor, owner, tenant, lessee or an authorized agent of one of these. A valid Certificate of Workers' Compensation Insurance must be presented at permit issuance. The certificate:

- Must show the name of the insured.
- Must list the policy number, effective date, and expiration date of the insurance policy.

If item 6.c. is checked, only the contractor or owner may sign this area, NOT AN AGENT. This section is signed only when the owner or contractor will have no employees on the job. If, after signing the exemption from the Workers' Compensation provisions of the Labor Code, the contractor or owner-builder should become subject to

such provisions, they must forthwith comply. In the event they do not comply with the Workers' Compensation Law, the permit shall be deemed revoked.

Owner-Builder Declaration

This statement may be signed by the owner, lessee, tenant, architect, engineer, licensed pest control operator, or an authorized agent of any of these. In every case, a separate Owner-Builder Verification form (DS-3042) must also be signed by the owner.

Important Instructions to Applicant

California State law requires every permit applicant to provide specific information and certain declarations regarding the proposed work. The following instructions describe who may sign the required declarations.

Licensed Contractor

This statement may be signed by the contractor or a corporate officer of a construction company including President, Vice President, Secretary, Treasurer, Trustee, Chairman of the Board or Responsible Managing Employee (RME). An agent for the contractor may sign only when a letter of authorization from the contractor authorizing the agent to sign is presented at permit issuance. The person signing must list his/her title.

Workers' Compensation Declaration

This statement may be signed by the contractor, owner, tenant, lessee or an authorized agent of one of these. A valid Certificate of Workers' Compensation Insurance must be presented at permit issuance. The certificate:

- a. Must show the name of the insured.
- b. Must list the policy number, effective date, and expiration date of the insurance policy.

If item 6.c. is checked, only the contractor or owner may sign this area, NOT AN AGENT. This section is signed only when the owner or contractor will have no employees on the job. If, after signing the exemption from the Workers' Compensation provisions of the Labor Code, the contractor or owner-builder should become subject to

such provisions, they must forthwith comply. In the event they do not comply with the Workers' Compensation Law, the permit shall be deemed revoked.

Owner-Builder Declaration

This statement may be signed by the owner, lessee, tenant, architect, engineer, licensed pest control operator, or an authorized agent of any of these. In every case, a separate Owner-Builder Verification form (DS-3042) must also be signed by the owner.

LIST OF AIR POLLUTION CONTROL DISTRICT PERMIT CATEGORIES

Businesses, which include any of the following operations or equipment, will require clearance from the Air Pollution Control District.

CHEMICAL

- 47 – Organic Gas Sterilizers
- 32 – Acid Chemical Milling
- 33 – Can & Coil Manufacturing
- 44 – Evaporators, Dryers & Stills Processing Organic Materials
- 24 – Dry Chemical Mixing & Detergent Spray Towers
- 35 – Bulk Dry Chemicals Storage
- 55 – Chrome Electroplating Tanks

COATINGS & ORGANIC SOLVENTS

- 27 – Coating & Painting
- 37 – Plasma Arc & Ceramic Deposition Spray Booths
- 38 – Paint, Stain & Ink Mfg
- 27 – Printing
- 27 – Polyester Resin/Fiberglass Operations

METALS

- 18 – Metal Melting Devices
- 19 – Oil Quenching & Salt Baths
- 32 – Hot Dip Galvanizing
- 39 – Precious Metals Refining

ORGANIC COMPOUND MARKETING (GASOLINE, ETC)

- 25 – Gasoline & Alcohol Bulk Plants & Terminals
- 26 – Intermediate Refuelers
- 27 – Gasoline & Alcohol Fuel Dispensing

COMBUSTION

- 34 – Piston Internal – Combustion Engines
- 13 – Boilers & Heaters (1 million BTU/hr or larger)
- 14 – Incinerators & Crematories
- 15 – Burn Out Ovens
- 16 – Core Ovens
- 20 – Gas Turbines, and Turbine Test Cells & Stands
- 48 – Landfill and/or Digester Gas Flares

ELECTRONICS

- 29 – Automated Soldering
- 42 – Electronic Component Mfg

FOOD

- 12 – Fish Canneries
- 12 – Smoke Houses
- 50 – Coffee Roasters
- 35 – Bulk Flour & Powered Sugar Storage

SOLVENT USE

- 28 – Vapor & Cold Degreasing
- 30 – Solvent & Extract Driers
- 31 – Dry Cleaning

ROCK AND MINERAL

- 04 – Hot Asphalt Batch Plants
- 05 – Rock Drills
- 06 – Screening Operations
- 07 – Sand Rock & Aggregate Plants
- 08 – Concrete Batch, CTB, Concrete Mixers, Mixers & Silos
- 10 – Brick Manufacturing

OTHER

- 01 – Abrasive Blasting Equipment
- 03 – Asphalt Roofing Kettles & Tankers
- 46 – Reverse Osmosis Membrane Mfg
- 51 – Aqueous Waste Neutralization
- 11 – Tire Buffers
- 17 – Brake Debanders
- 23 – Bulk Grain & Dry Chemical Transfer & Storage
- 45 – Rubber Mixers
- 21 – Waste Disposal & Reclamation Units
- 36 – Grinding Booths & Rooms
- 40 – Asphalt Pavement Heaters
- 43 – Ceramic Slip Casting
- 41 – Perlite Processing
- 40 – Cooling Towers – Registration Only
- 91 – Fumigation Operations
- 56 – WWTP (1 million gal/day or larger) & Pump Station

NOTE: OTHER EQUIPMENT NOT LISTED HERE THAT IS CAPABLE OF EMITTING AIR CONTAMINANTS MAY REQUIRE AN AIR POLLUTION CONTROL DISTRICT PERMIT. IF THERE ARE ANY QUESTIONS, CONTACT THE AIR POLLUTION CONTROL DISTRICT AT (858) 586-2600.

Guardian Sailors Train with Tears

Story Number: NNS070723-13

Release Date: 7/23/2007 4:43:00 PM

By Mass Communication Specialist 2nd Class (SW) Joshua J. Wahl, Fleet Public Affairs Center Detachment Sasebo

SASEBO, Japan (NNS) -- USS Guardian (MCM 5) Sailors performed a series of security maneuvers with eyes searing from exposure to oleoresin capsicum (OC), also known as pepper spray, July 19, as part of a two-week security training course.

The OC training was a component of the Ship's Reactionary Force-Basic (SRF-B) course offered to watch standers. Sailors who experience the effects of OC will better understand and appreciate it as a means to deescalating physical threats.

Course participants were sprayed with OC and then attempted an obstacle course that included utilizing control holds, verbal commands and take-downs maneuvers. The various stations implemented skills learned previously in the SRF-B course.

"I feel all the guys out here were pumped up, ready to go and did a really great job today," said Quartermaster 1st Class (SW) Ryan F. Curylo, Guardian SRF-B instructor. "I am confident we will be ready to move on into the next week of training with success."

Previously qualified SRF-B Sailors from the Guardian participated with their shipmates for moral support and help with the various scenarios that took place.

"I remember going through this training and enjoy seeing [other Sailors] getting qualified today," said Mineman 3rd Class Frank A. Esposito. "I think everybody here is having fun today and looking for the chance to move on to the next step."

Safety played a key role for the successful completion of this training. On-scene medical personnel provided guidelines to ensure the safety of the Sailors and Guardian Sailors were able to fully experience the OC spray without injury.

Previous classroom training also emphasized proper procedures and how to react in situations where pepper spray might be used.

"During the past couple of days, we have been getting ready for this moment but no matter what they tell you, nothing can ever really prepare you for what we are going through," said Quartermaster Seaman Aaron B. Carstensen after finishing the course, eyes still a little bleary. "But we made it through and now have this experience to go from when we do it for the real thing."

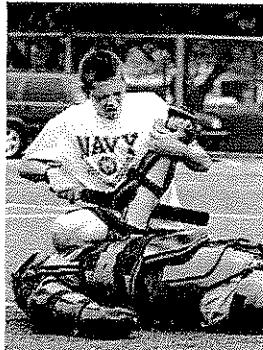

Guardian serves under Task Force 76 and serves as the 7th Fleet's mine countermeasures arm in forward-deployed operations. Task Force 76 is the Navy's only forward-deployed amphibious force based in Okinawa, with an operating detachment in Sasebo.

SRF-B Teaching Nashville Sailors to Keep Ship Safe

Story Number: NNS080606-06

Release Date: 6/6/2008 12:52:00 PM

By Mass Communication Specialist 1st Class Charles L. Ludwig, USS Nashville Public Affairs

USS NASHVILLE, At Sea (NNS) -- Sailors aboard USS Nashville (LPD 13) completed Security Reaction Force Basic (SRF-B) training during a two-week testing, and qualification period during their deployment, April 26-May 17.

SRF-B is a Navywide security training program, taught to all topside watchstanders in order to standardize watchstanding procedures. To meet this Navy requirement, Nashville's Security Department holds monthly classes.

For Nashville's SRF-B lead instructor Chief Master-at-Arms (SW) Timothy Ashton, the SRF-B course is an absolute necessity for Sailors aboard the amphibious transport dock ship.

"SRF-B provides our Sailors the necessary knowledge and skills to effectively and proficiently perform the duties of an armed sentry and interact as a basic security reaction force team member with the assigned unit's security reaction force," said Ashton.

"It's a Navy requirement, but it's also something that our Sailors need to learn for their own personal responsibilities and safety as a watchstander," he continued.

During the course, taught by Ashton, Senior Chief Mineman (SW) Shawn Bee and Gunner's Mate 2nd Class (SW) Chris LeCroy, students receive certifications in the use of nonlethal weapons, employment of the baton, utilization of oleoresin capsicum (OC) spray, along with 9 millimeter handgun, M-16 rifle and shotgun qualifications.

LeCroy noted the last two graduating classes faced an even tougher challenge than the usual certifications and qualifications – Nashville's current deployment.

"Our schedule leads to some difficulties," said LeCroy. "We really have to work hard to get around the schedule from time-to-time with general quarters drills, other drills and gun shoots. Coordinating against the schedule from day-to-day is something that we had to really look hard at to make sure these Sailors were getting everything they needed."

But in some ways, SRF-B is more suited to an underway environment, with more than 90 percent of the course being a hands-on intensive study, LeCroy noted. The course includes empty-hand control techniques, or unarmed combat and personnel control, various uses of force including when and how to use the seven levels of force, including deadly force, personnel and vehicle security inspections and weapons training.

The course offers a wealth of topics and an opportunity for practical application of the skills learned.

"We had a lot of guys get a lot out of it," said LeCroy. "There is a lot of information in the course, and a lot of it is very in-depth. But they tend to do a good job in retaining that information. Even our more senior guys, people who have done this before, are able to learn a lot about how things work now compared to how it worked when they first went through."

Eighteen Sailors received their SRF-B qualifications during the most recent training. In all, 42 Sailors have taken the course during the current deployment, including Sailors from both the enlisted and officer ranks.

"We will be holding these classes monthly to make sure that we are ready to go when a problem arises," said Ashton. "Everyone here needs to make sure they are prepared to protect the ship. We'll do what we can to make sure that happens."

Stennis' Security Force Rolls Out New Training

Story Number: NNS060215-17

Release Date: 2/15/2006 7:00:00 PM

By Journalist 2nd Class Christopher Gethings, USS John C. Stennis Public Affairs

USS JOHN C STENNIS, At Sea (NNS) -- Naval Security Force (NSF) personnel aboard USS John C. Stennis (CVN 74) began their first Security Reaction Force Basic (SRFB) training aboard during a two-week testing and qualification underway period Feb. 1-14.

SRFB is a fairly new, Navywide, standardized training program taught to all NSF personnel. Stennis' security department will hold as many classes as possible for its NSF personnel during this year's testing and qualification workup schedule.

"We'll hold the course until all of our personnel have successfully completed it," said Master-at-Arms 1st Class Kenneth Watson, SRFB lead instructor. "The goal is to have all of our NSF personnel qualified in the newest training the Navy has to offer."

According to Watson, SRFB is a much more in-depth training course for Stennis' security forces.

"There isn't as much classroom time. Instead it's replaced with practical hands-on application. I think this makes for a much more exciting and beneficial training program," said Watson.

The new course includes empty-hand control techniques, or unarmed combat and personnel control, various uses of force including when and how to use the seven levels of force, including deadly force, personnel and vehicle security inspections and weapons training. Before now, basic security training was given but it didn't necessarily match the training given by other Naval commands due to a lack of a Navywide standard.

"I thought the training [offered by SRFB] was excellent," said Electronics Technician 3rd Class Michael Goodwin, temporarily assigned to Stennis' NSF. Goodwin attended the training when it was mainly handled at Naval Base Kitsap Bangor. "The course was very informative, and I definitely feel I learned a great deal about my job. It aids in our main mission to protect the crew and the ship."

Many of Stennis' NSF personnel seem to be benefiting from the class being held aboard.

"It's nice to be able to attend the training where we work and live," said Fire Controlman 3rd Class Jessie Brumley, NSF. "I've been in security for less than one month, so this is giving me great job training along with giving me a chance to get to know all of the people I'll now be working with."

Brumley has gone through the classroom training on security inspections and the levels of force, and is currently participating in the hands-on empty hand control portion of the SRFB course.

"I think the training is very beneficial to all of us and I think it's definitely necessary," she added. "I'm really looking forward to the weapons training we'll complete when we pull back into Bremerton."

SRFB qualifies NSF personnel on the 9 mm pistol, 12-gauge shotgun and the M-16 rifle. The training is held at the Naval Base Kitsap Bangor gun range facilities and is the last phase of the training for these students.

Guardian Sailors train with tears

MC2 (SW) Joshua J. Wahl, *Fleet Public Affairs Center Detachment Sasebo, Japan.*

Posted Date: July 24, 2007

USS Guardian (MCM 5) Sailors performed a series of security maneuvers with eyes searing from exposure to Oleoresin Capsicum (OC), also known as pepper spray, July 19, as part of a two-week security training course.

The OC training was a component of Ship's Reactionary Force-Basic (SRF-B) course and was done so that watch standers could understand the effects of the chemical compound OC's dealing with adverse physical situations and deescalating physical threats.

Course participants were sprayed with OC and then were made to go through a type of obstacle course that included utilizing control holds, verbal commands and take-downs maneuvers. The various stations implemented skills learned previously in the SRF-B course.

"I feel all the guys out here were pumped up, ready to go and did a really great job today," said Quartermaster 1st Class (SW) Ryan F. Curylo, Guardian SRF-B instructor. "I am confident we will be ready to move on into the next week of training with success."

Already qualified SRF-B Sailors from the Guardian participated with their shipmates for moral support and help with the various scenarios that took place.

"I remember going through this training and enjoy seeing getting qualified today," said Mineman 3rd Class Frank A. Esposito, Guardian Sailor. "I think everybody here is having fun today and looking for the chance move on to the next step."

Safety played a key role for the successful completion of this training. Medical personnel on-scene provided guidelines to ensure the safety of the Sailors and how to cope with the side effects of the spray. Due to the medical preparedness, Guardian Sailors were able to fully experience the OC spray without injury.

Previous classroom training also emphasized proper procedures how to react in situations where pepper spray might be used.

"During the past couple days, we have been getting ready for this moment but no matter what they tell you, nothing can ever really prepare you for what we are going through," said Quartermaster Seaman Aaron B. Carstensen, after finishing the course, eyes still a little bleary. "But we made it through and now have this experience to go from when we do it for the real thing."

Mineman 3rd Class Richard J. Shuler, assigned to USS Guardian (MCM 5), is sprayed with Oleoresin Capsicum, pepper spray, during a required security reaction force basic course. Watchstanders from the ship endure this type of training to understand the chemical effects while performing basic weapons training, verbal commands, and take-down maneuvers. (U.S. Navy Photo by MC2 (SW) Joshua J. Wahl)

The Sailors are thankful that as they to the classroom for the next phase of a two-week of training course that they will be seeing clearly.

Synopsis:

Added: Apr 10, 2008 11:18 am

Naval Air Warfare Systems, Orlando Training Systems Division, in support of the Center for Security Forces, intends to issue a contract modification to San Diego City College, under contract N61339-03-D-0166, on a sole-source basis due to only one known responsible source who can meet the requirement until the full scope of the requirement can be solicited competitively. This contract extension will provide for instructional support of the Security Reaction Forces – Basic (SRF-B), Security Reaction Forces - Advanced (SRF-A), Antiterrorism/Force Protection Training Supervisor (TRASUP), Antiterrorism Officer (ATO), Small Arms Marksmanship Instructor (SAMI) and Non-Lethal Weapons Basic Instructor (NLW-BI) courses on an instructor only basis, and the Visit, Board, Search and Seizure Mechanical Breacher (VBSS MB) course on a turn-key basis, with the contractor providing all instructors, course materials, equipment and facilities. This contract modification will extend the period of performance for these courses from 31 May 2008 to 30 November 2008. Although more than one source may be able to fulfil the requirement, this would create substantial duplication of cost to the Government that is not expected to be recovered through a competition for the short term extension of services. The SRF-B training will provide Navy personnel the fundamentals of watch standing and the use of weapons. The SRF-A training will provide to personnel assigned to a security reaction force team the training and education for the prevention of threats, whether from the pier, small boat, or any other means from penetrating a unit, in accordance with current naval directives under normal and emergency situations. The TRASUP training will provide antiterrorism and force protection (ATFP) supervisors with the necessary knowledge and skills to oversee the day-to-day ATFP readiness of the unit, conduct initial and sustainment training for assigned ATFP personnel and function as the unit Navy ATFP tactics, techniques and procedures subject matter experts. The ATO course will provide effective briefing techniques and practical introduction to Terrorism, Terrorist Operations, Detecting Terrorist Surveillance, Individual Protective Measures, Hostage Survival, Threat Detection, Security Officer/Department Duties, Equipment Selection, Legal Issues, Use of Deadly Force, Rules of Engagement, Threat Management, Access Control, Security Surveys, Physical Security Plans, Barriers, Lighting, Personnel and Vehicle movement, Community/Public Relations, Bomb Threat Planning and Exercise and Threatcom Management Implementation. The SAMI course will provide Navy personnel the training required to perform duties of a small arms instructor and earn a Navy Enlisted classification or 0812, either ashore or afloat. The NLW-BI course graduates will be qualified as "basic instructors" and be certified to teach pressure point control techniques (PPCT), Empty Hand Control Techniques (ECHT), Handheld Oleoresin Capsicum (OC)(i.e. pepper spray), batons and handcuffs (steel/flexi-cuffs). The VBSS-MB course will provide safe and effective training to designated surface ship NCB VBSS team personnel to perform duties as mechanical breacher, utilizing appropriate breaching tools and techniques against various targets during non-compliant Maritime Interdiction Operations. The proposed contract action is for services for which the Government intends to solicit and negotiate with only one source under the authority of FAR 6.302-1. Interested persons may identify their interest and capability to respond to the requirement or submit proposals. This notice of intent is not a request for competitive proposals. However, all proposals received within 15 days after date of publication of this synopsis will be considered by the Government. A determination by the Government not to compete with this proposed contract based upon responses to this notice is solely within the discretion of the Government. Information received will normally be considered solely for the purpose of determining whether to conduct a competitive procurement. If you have any questions or concerns, please contact the Contract Specialist, Bradley C. Johnson, at Bradley.c.johnson1@navy.mil or call (407) 380-4808.

Review Information

Cycle Type: 1 BDR-Structural (Submit)	Submitted: 05/28/2008	Deemed Complete on 05/28/2008
Reviewing Discipline: BDR-Structural	Cycle Distributed: 05/28/2008	
Reviewer: Glanville, David (619) 687-5957	Assigned: 05/29/2008	
Hours of Review: 4.00	Started: 05/30/2008	
Next Review Method: BDR-Structural (Submit)	Review Due: 06/11/2008	
	Completed: 06/03/2008	COMPLETED ON TIME
	Closed: 06/03/2008	

- The reviewer has indicated they want to review this project again. Reason chosen by the reviewer: First Review Issues.
- We request a 2nd complete submittal for BDR-Structural on this project as: BDR-Structural (Submit).
- The reviewer has requested more documents be submitted.
- Your project still has 55 outstanding review issues with BDR-Structural (all of which are new).
- The reviewer has not signed off 1 job.
- Last month BDR-Structural performed 1021 reviews, 85.4% were on-time, and 83.6% were on projects at less than < 3 complete submittals.

Cleared?	Issue Num	Issue Text
<input type="checkbox"/>	1	For a recheck appointment call (619)446-5300. " Please have the project number available when you call for the appointment. The project number is displayed in a "box" near the upper left corner of the Issues report." If you have questions on the architectural or structural review, phone David glanville @ (619) 687-5957 or fax @ (619) 446-5483. (New Issue)
<input type="checkbox"/>	2	This list does not necessarily include all errors and omissions. Plans require correction as indicated by comments before a building permit can be issued. Return a copy of this issues report with corrected plans. (New Issue)
<input type="checkbox"/>	3	It is the responsibility of the architect or engineer of record to assure that all requirements of the latest adopted edition of the California Building Code as well as other regulations and ordinances of the City of San Diego, are satisfied and incorporated in the plans, specifications and structural calculations. (New Issue)
<input type="checkbox"/>	4	To Facilitate Rechecking, Provide an Itemized Written Response to the Issues Noted in this Plan Review Sheet. The Written Response Shall Clearly, Concisely and Comprehensively Address the Issues Raised. (New Issue)
<input type="checkbox"/>	5	Make all corrections on original tracings before resubmitting to the Development Services Department for recheck. Return corrected plans, one set of corrected calculations and one set each of original plans and calculations used for plan review. Supplemental plan review fees may be charged where insufficient progress is made in responding to plan review comments. For permit issuance, 2 complete sets of plans and a partial set of plans for the County Assessor will be required. (New Issue)
<input type="checkbox"/>	6	Please indicate here if any changes have been made to the plans that are not a result of corrections from this list. If there are other changes, please briefly describe them and where they are located on the plans. Have changes been made not resulting from this list? O Yes O No (New Issue)

Issues

Cleared?	Issue Num	Issue Text
<input type="checkbox"/>	7	All sheets of plans and first sheet of calculations must be signed by a civil engineer or architect licensed by the State of California. The engineer must stamp the above and note license expiration date; architects must note license number (Sec. 106.3.2, 106.3.4). Please stamp and sign the final sets. (New Issue)
<input type="checkbox"/>	8	Sheet A1.01. The Building Code Data and Project Description specify a one story building with no new floor area created by this project. Sheet A1.03 shows new second and third floor plans. The proposed second and third floors are creating additional floor area. The scope of work must be revised to reflect this new area. (OFFICE USE ONLY: The plan reviewer must update all applicable project attributes in PTS). (New Issue)
<input type="checkbox"/>	9	If the second and third floors meet the requirements of a mezzanine per Section 505, the areas must be classified as such on sheet A1.01. (New Issue)
<input type="checkbox"/>	10	Sheet A1.03. Label all rooms and spaces and provide a detailed description of the intended use for each of the rooms and spaces. (New Issue)
<input type="checkbox"/>	11	All portions of the structure shall be classified with respect to occupancy per Section 302. A review of all requirements based on use and occupancy classification, including the means of egress system per Chapter 10, will be conducted after a detailed description of the intended use and occupancy classification are provided. (New Issue)

For questions regarding the "BDR-Structural" review, please call David Glanville at (619) 687-5957. Project Nbr: 157613 / Cycle: 1

Cleared?	Issue Num	Issue Text
<input type="checkbox"/>	12	Specify the ceiling height in all rooms and spaces. Section 1208.2. (New Issue)
<input type="checkbox"/>	13	Provide complete plans and engineering calculations for all structural elements, including the stairs, stair landings, floor framing and lateral bracing. (New Issue)
<input type="checkbox"/>	14	Specify if any new ceilings are proposed. Provide complete structural details for any new ceilings. (New Issue)
<input type="checkbox"/>	15	Specify the ICC approval number for the expanded metal grate at the second floor and provide specifications for the grate on the plans. (New Issue)
<input type="checkbox"/>	16	Sheet S1.01. Plans, specifications and design calculations are required where the metal storage containers are altered (e.g. openings for the stairs). (New Issue)
<input type="checkbox"/>	17	Stacked metal storage containers must be connected together at each corner and justified by structural calculations for applicable loads. (New Issue)
<input type="checkbox"/>	18	Double stacked metal storage containers must be provided with a foundation system designed to support the loads. Containers provide with utilities must be supported on footings and anchored to the footings. (New Issue)
<input type="checkbox"/>	19	Specify if any equipment will be attached to the structure shown on sheet S1.01. If yes, show the weight and location of the equipment on the framing plans, and provide engineering calculations for the support and anchorage of the equipment to the structure. (New Issue)
<input type="checkbox"/>	20	Provide a wall/partition section showing: <ul style="list-style-type: none"> - Type, size and spacing of studs. - Method of attaching top and bottom plates to structure. - Show that tops of partitions are secured to roof or floor framing or provide calculations for support of out-of-plane loads - Height of partition and suspended ceiling and distance from ceiling to structure above. - Wall sheathing thickness, size and spacing of sheathing fasteners. (New Issue)
<input type="checkbox"/>	21	Provide structural cross sections through the proposed structure (one section through the area with two levels and one section through the area with three floor levels). (New Issue)
<input type="checkbox"/>	22	[1009.2] Stairways shall have a minimum headroom clearance of 80 inches (2032 mm) measured vertically from a line connecting the edge of the nosings. Such headroom shall be continuous above the stairway to the point where the line intersects the landing below, one tread depth beyond the bottom riser. The minimum clearance shall be maintained the full width of the stairway and landing. (New Issue)
<input type="checkbox"/>	23	[1009.3] Stair risers shall be between 4 inches and (102 mm) 7 in. (178 mm) high. Stair treads shall be 11 inches (279 mm) minimum deep. (New Issue)
<input type="checkbox"/>	24	[1008.1.1] The minimum width of each means of egress door opening shall be sufficient for the occupant load thereof and a clear width of not less than 32 in. (813 mm). Clear openings with swinging doors shall be measured between the face of the door, open 90 degrees (1.57 rad) and the stop. Where a door opening includes two door leaves without a mullion, one leaf shall provide a clear opening width of 32 inches (813 mm). The maximum width of a swinging door leaf shall be 48 in. (1219 mm) nominal. The height of doors shall not be less than 80 in. (2032 mm). (New Issue)
<input type="checkbox"/>	25	Guards: Guards shall be located along open-sided walking surfaces, mezzanines, balconies, decks, porches, stairways, ramps and landings that are located more than 30 inches above the floor or grade below. [Sec. 1013.1]. (New Issue)
<input type="checkbox"/>	26	Guards height: Guards shall form a protective barrier not less than 42 inches high measured vertically above the leading edge of the tread, adjacent walking surface or adjacent seatboard. [Sec. 1013.2]. Show this dimension on guards detail. (New Issue)
<input type="checkbox"/>	27	Guards opening limitations: Open guards shall have balusters or ornamental patterns such that a 4-inch-diameter sphere can not pass through any opening. [Sec. 1013.3]. Show this dimension on guards detail. (New Issue)
<input type="checkbox"/>	28	Guards details: Show complete structural details for guards. Details as a minimum should indicate the size, spacing and grade of support balusters, size and grade of the support beam, structural connection details for support balusters to support beam, etc. . (New Issue)
<input type="checkbox"/>	29	Special inspections, Structural tests and Structural observations shall comply with the applicable provisions of Chapter 17 of the 2007 California Building Code. (New Issue)
<input type="checkbox"/>	30	Provide a 'Statement of Special Inspections' on plans, in accordance with Section 1705. The Statement of Special Inspections shall identify the following: 1) Materials, systems, components and work required to have special inspections or testing, 2) Type and extent of each special inspection, 3) Type and extent of each test, 4) Additional requirements for special inspection or testing for seismic or wind resistance, 5) Identification as to whether special inspection will be performed on a continuous or periodic basis, and 6) Structural observations. [Sec. 106.1, 1704.1.1, 1705, 1709]. (New Issue)
<input type="checkbox"/>	31	Statement of special inspections shall be a complete and comprehensive list, identifying in one location on plans, all work requiring special inspection, testing and, structural observation. The list must be project specific. [Sec. 1705].
<input type="checkbox"/>	32	(OFFICE USE ONLY: The plan reviewer must update the special inspection attributes in PTS) (New Issue)
<input type="checkbox"/>	32	Properly complete and sign the enclosed Property Owner/Contractor agreement form for special inspection, construction materials testing and, structural observation. It must be submitted at Permit Services Division, prior to issuance of the permit. (New Issue)

For questions regarding the 'BDR-Structural' review, please call David Gianville at (619) 687-5957. Project Nbr: 157613 / Cycle: 1

<input type="checkbox"/>	33	Contractor's responsibility: The contractor shall submit a written statement of responsibility for construction of items listed in the statement of special inspections prior to the commencement of work. [Sec. 1706.1]. (New Issue)
<input type="checkbox"/>	34	The contractor's statement of responsibility shall contain: 1) Acknowledgment of awareness of the special requirements contained in the statement of special inspections; 2) Acknowledgement that control will be exercised to obtain conformance with the construction documents approved by the building official; 3) procedures for exercising control within the contractor's organization, the method and frequency of reporting and distribution of the reports; and 4) Identification and qualifications of the person(s) exercising such control and their position(s) in the the organization. [Sec. 1706.1]. (New Issue)
<input type="checkbox"/>	35	Note on plans: "A Property Owner's Final Report form for work required to have special inspections, testing and structural observations must be completed by the property owner, property owner's agent of record, architect of record or, engineer of record and submitted to the inspection Services Division." (New issue)

Disabled Access

Cleared?	Issue	Issue Text
Cleared?	Num	Issue Text
<input type="checkbox"/>	36	In existing buildings (including those identified as historic buildings) compliance with the California Building Code Disabled Access Provisions is triggered by renovations, structural repairs, alterations (tenant improvements) and additions to these buildings. The term "remodel" here represents all work associated with the renovations, structural repairs, alterations and additions to existing buildings. (New Issue)
<input type="checkbox"/>	37	Sign the following note on the site plan, if applicable: "I am the designer/owner in responsible charge of this tenant improvement project; I have inspected the site/premises and determined that existing conditions are in full compliance with current site accessibility requirements to the extent required by law. Signature: _____ Date: _____" (New Issue)
<input type="checkbox"/>	38	If applicable, sign the following note on the site plan: "I am the designer/owner in responsible charge of this tenant improvement project; I have inspected the restrooms and determined that existing conditions are in full compliance with current site accessibility requirements to the extent required by law. Signature: _____ Print Name: _____ Date: _____" (New Issue)
<input type="checkbox"/>	39	For the purpose of Title 24, the use of the term Exit Door in Section 1133B applies to all doors that provide access, that is, entrances, passage doors, etc. (New Issue)
<input type="checkbox"/>	40	Latching and locking hand-activated doors in a path of travel shall be operable with a single effort by lever type hardware, panic bars, push-pull activating bars, or other hardware designed to provide passage without requiring the ability to grasp the opening hardware. Locked exit doors shall operate as above in egress direction. (Sec. 1133B.2.5.2) (New Issue)
<input type="checkbox"/>	41	Hand-activated door opening hardware shall be centered between 30 inches (762 mm) and 44 inches (1118 mm) above the floor. (Sec. 1133B.2.5.2) (New Issue)
<input type="checkbox"/>	42	The width and height of doorways shall comply with section 1003.3.1.3a. Every required exit doorway shall be of a size as to permit the installation of a door not less than 3 feet (914 mm) in width and not less than 6 feet 8 inches (2032 mm) in height. When installed in exit doorways, exit doors shall be capable of opening at least 90 degrees and shall be so mounted that the clear width of the exit is not less than 32 inches (813 mm). (Sec. 1133B.2.2 and Figure 11B-33) (New Issue)
<input type="checkbox"/>	43	There shall be a level and clear floor or landing on each side of a door. The level area shall have a length in the direction of door swing of at least 60 inches (1524 mm) and the length opposite the direction of door swing of 48 inches (1219 mm) as measured at right angle to the plane of the door in its closed position. (Sec. 1133B.2.4.2 and Fig. 11B-26A and B) (New Issue)
<input type="checkbox"/>	44	The floor or landing shall not be more than 1/2 inch (12.7 mm) lower than the threshold of the doorway. (Sec. 1133B.2.4.1 and Figures 11B-32) (New Issue)
<input type="checkbox"/>	45	The bottom 10 inches (254 mm) of all doors except automatic and sliding shall have a smooth, uninterrupted surface to allow the door to be opened by a wheelchair footrest without creating a trap or hazardous condition. Where narrow frame doors are used, a 10 inch (254 mm) high smooth panel shall be installed on the push side. (Sec. 1133B.2.6 and Fig. 11B-29) (New Issue)
<input type="checkbox"/>	46	Maximum effort to operate doors shall not exceed 5 pounds (22 N) for exterior and interior doors, applied at right angles to hinged doors and at the center plane of sliding or folding doors. Compensating devices or automatic door operators may be utilized. The maximum effort to operate fire doors may be increased up to 15 pounds (66.72 N) if allowed by the appropriate administrative authority. (Sec. 1133B.2.5) (New Issue)
<input type="checkbox"/>	47	Stairways shall have handrails on each side, and every stairway required to be more than 88 inches (2235 mm) in width shall be provided with not less than one intermediate handrail for each 88 inches (2235 mm) of required width. Intermediate handrails shall be spaced approximately equally across the entire width of the stairway. (Sec. 1133B.4.1.1) (New Issue)
<input type="checkbox"/>	48	Stair handrails shall be 34 to 38 inches (864 to 965 mm) above the nosing of the treads. (Sec. 1133B.4.2.1 and Fig. 11B-35) (New Issue)
<input type="checkbox"/>	49	Stair handrails shall extend a minimum of 12 inches (305 mm) beyond the top nosing and 12 inches (305 mm) plus the tread width beyond the bottom nosing. (Sec. 1133B.4.2.2 and Fig. 11B-35 and 11B-37) (New Issue)
<input type="checkbox"/>	50	Stair handrail ends shall be returned or terminate in newel posts or safety terminals. (Sec. 1133B.4.2.3) (New Issue)

<input type="checkbox"/>	7	All sheets of plans and first sheet of calculations must be signed by a civil engineer or architect licensed by the State of California. The engineer must stamp the above and note license expiration date; architects must note license number (Sec. 106.3.2, 106.3.4). Please stamp and sign the final sets. (From Cycle 1)
<input type="checkbox"/>	8	Sheet A1.01. The Building Code Data and Project Description specify a one story building with no new floor area created by this project. Sheet A1.03 shows new second and third floor plans. The proposed second and third floors are creating additional floor area. The scope of work must be revised to reflect this new area. (OFFICE USE ONLY: The plan reviewer must update all applicable project attributes in PTS). (From Cycle 1)
<input type="checkbox"/>	9	If the second and third floors meet the requirements of a mezzanine per Section 505, the areas must be classified as such on sheet A1.01. (From Cycle 1)
<input type="checkbox"/>	10	Sheet A1.03. Label all rooms and spaces and provide a detailed description of the intended use for each of the rooms and spaces. (From Cycle 1)
<input type="checkbox"/>	11	All portions of the structure shall be classified with respect to occupancy per Section 302. A review of all requirements based on use and occupancy classification, including the means of egress system per Chapter 10, will be conducted after a detailed description of the intended use and occupancy classification are provided. (From Cycle 1)
<input type="checkbox"/>	12	Specify the ceiling height in all rooms and spaces. Section 1208.2. (From Cycle 1)
<input type="checkbox"/>	13	Provide complete plans and engineering calculations for all structural elements, including the stairs, stair landings, floor framing and lateral bracing. (From Cycle 1)
<input type="checkbox"/>	14	Specify if any new ceilings are proposed. Provide complete structural details for any new ceilings. (From Cycle 1)
<input type="checkbox"/>	15	Specify the ICC approval number for the expanded metal grate at the second floor and provide specifications for the grate on the plans. (From Cycle 1)
<input type="checkbox"/>	16	Sheet S1.01. Plans, specifications and design calculations are required where the metal storage containers are altered (e.g. openings for the stairs). (From Cycle 1)

For questions regarding the "BDR-Structural" review, please call David Glanville at (619) 687-5957. Project Nbr. 157612/Cycle 11.

Cleared?	Issue Num	Issue Text
<input type="checkbox"/>	17	Stacked metal storage containers must be connected together at each corner and justified by structural calculations for applicable loads. (From Cycle 1)
<input type="checkbox"/>	18	Double stacked metal storage containers must be provided with a foundation system designed to support the loads. Containers provide with utilities must be supported on footings and anchored to the footings. (From Cycle 1)
<input type="checkbox"/>	19	Specify if any equipment will be attached to the structure shown on sheet S1.01. If yes, show the weight and location of the equipment on the framing plans, and provide engineering calculations for the support and anchorage of the equipment to the structure. (From Cycle 1)
<input type="checkbox"/>	20	Provide a wall/partition section showing: <ul style="list-style-type: none"> - Type, size and spacing of studs. - Method of attaching top and bottom plates to structure. - Show that tops of partitions are secured to roof or floor framing or provide calculations for support of out-of-plane loads - Height of partition and suspended ceiling and distance from ceiling to structure above. - Wall sheathing thickness, size and spacing of sheathing fasteners. (From Cycle 1)
<input type="checkbox"/>	21	Provide structural cross sections through the proposed structure (one section through the area with two levels and one section through the area with three floor levels). (From Cycle 1)
<input type="checkbox"/>	22	[1009.2] Stairways shall have a minimum headroom clearance of 80 inches (2032 mm) measured vertically from a line connecting the edge of the nosings. Such headroom shall be continuous above the stairway to the point where the line intersects the landing below, one tread depth beyond the bottom riser. The minimum clearance shall be maintained the full width of the stairway and landing. (From Cycle 1)
<input type="checkbox"/>	23	[1009.3] Stair risers shall be between 4 inches and (102 mm) 7 in. (178 mm) high. Stair treads shall be 11 inches (279 mm) minimum deep. (From Cycle 1)
<input type="checkbox"/>	24	[1008.1.1] The minimum width of each means of egress door opening shall be sufficient for the occupant load thereof and a clear width of not less than 32 in. (813 mm). Clear openings with swinging doors shall be measured between the face of the door, open 90 degrees (1.57 rad) and the stop. Where a door opening includes two door leaves without a mullion, one leaf shall provide a clear opening width of 32 inches (813 mm). The maximum width of a swinging door leaf shall be 48 in. (1219 mm) nominal. The height of doors shall not be less than 80 in. (2032 mm). (From Cycle 1)
<input type="checkbox"/>	25	Guards: Guards shall be located along open-sided walking surfaces, mezzanines, balconies, decks, porches, stairways, ramps and landings that are located more than 30 inches above the floor or grade below. [Sec. 1013.1]. (From Cycle 1)
<input type="checkbox"/>	26	Guards height: Guards shall form a protective barrier not less than 42 inches high measured vertically above the leading edge of the tread, adjacent walking surface or adjacent seatboard. [Sec. 1013.2]. Show this dimension on guards detail. (From Cycle 1)
<input type="checkbox"/>	27	Guards opening limitations: Open guards shall have balusters or ornamental patterns such that a 4-inch-diameter sphere can not pass through any opening. [Sec. 1013.3]. Show this dimension on guards detail. (From Cycle 1)
<input type="checkbox"/>	28	Guards details: Show complete structural details for guards. Details as a minimum should indicate the size, spacing and grade of support balusters, size and grade of the support beam, structural connection details for support balusters to support beam, etc. . (From Cycle 1)
<input type="checkbox"/>	29	Special inspections, Structural tests and Structural observations shall comply with the applicable provisions of Chapter 17 of the 2007 California Building Code. (From Cycle 1)
<input type="checkbox"/>	30	Provide a 'Statement of Special Inspections' on plans, in accordance with Section 1705. The Statement of Special Inspections shall identify the following: 1) Materials, systems, components and work required to have special inspections or testing, 2) Type and extent of each special inspection, 3) Type and extent of each test, 4) Additional requirements for special inspection or testing for seismic or wind resistance, 5) Identification as to whether special inspection will be performed on a continuous or periodic basis, and 6) Structural observations. [Sec. 106.1, 1704.1.1, 1705, 1709]. (From Cycle 1)
<input type="checkbox"/>	31	Statement of special inspections shall be a complete and comprehensive list, identifying in one location on plans, all work requiring special inspection, testing and, structural observation. The list must be project specific. [Sec. 1705]. (OFFICE USE ONLY: The plan reviewer must update the special inspection attributes in PTS) (From Cycle 1)
<input type="checkbox"/>	32	Properly complete and sign the enclosed Property Owner/Contractor agreement form for special inspection, construction materials testing and, structural observation. It must be submitted at Permit Services Division, prior to issuance of the permit. (From Cycle 1)
<input type="checkbox"/>	33	Contractor's responsibility: The contractor shall submit a written statement of responsibility for construction of items listed in the statement of special inspections prior to the commencement of work. [Sec. 1706.1]. (From Cycle 1)
<input type="checkbox"/>	34	The contractor's statement of responsibility shall contain: 1) Acknowledgment of awareness of the special requirements contained in the statement of special inspections; 2) Acknowledgement that control will be exercised to obtain conformance with the construction documents approved by the building official; 3) procedures for exercising control within the contractor's organization, the method and frequency of reporting and distribution of the reports; and 4) Identification and qualifications of the person(s) exercising such control and their position(s) in the the organization. [Sec. 1706.1]. (From Cycle 1)

35 Note on plans: "A Property Owner's Final Report form for work required to have special inspections, testing and structural observations must be completed by the property owner, property owner's agent of record, architect of record or, engineer of record and submitted to the Inspection Services Division." (From Cycle 1)

Disabled AccessIssueCleared?Issue Num

36 In existing buildings (including those identified as historic buildings) compliance with the California Building Code Disabled Access Provisions is triggered by renovations, structural repairs, alterations (tenant improvements) and additions to these buildings. The term "remodel" here represents all work associated with the renovations, structural repairs, alterations and additions to existing buildings. (From Cycle 1)

37 Sign the following note on the site plan, if applicable:
"I am the designer/owner in responsible charge of this tenant improvement project; I have inspected the site/premises and determined that existing conditions are in full compliance with current site accessibility requirements to the extent required by law. Signature: _____ Date: _____" (From Cycle 1)

38 If applicable, sign the following note on the site plan:
"I am the designer/owner in responsible charge of this tenant improvement project; I have inspected the restrooms and determined that existing conditions are in full compliance with current site accessibility requirements to the extent required by law. Signature: _____ Print Name: _____ Date: _____" (From Cycle 1)

39 For the purpose of Title 24, the use of the term Exit Door in Section 1133B applies to all doors that provide access, that is, entrances, passage doors, etc. (From Cycle 1)

40 Latching and locking hand-activated doors in a path of travel shall be operable with a single effort by lever type hardware, panic bars, push-pull activating bars, or other hardware designed to provide passage without requiring the ability to grasp the opening hardware. Locked exit doors shall operate as above in egress direction. (Sec. 1133B.2.5.2) (From Cycle 1)

41 Hand-activated door opening hardware shall be centered between 30 inches (762 mm) and 44 inches (1118 mm) above the floor. (Sec. 1133B.2.5.2) (From Cycle 1)

42 The width and height of doorways shall comply with section 1003.3.1.3a. Every required exit doorway shall be of a size as to permit the installation of a door not less than 3 feet (914 mm) in width and not less than 6 feet 8 inches (2032 mm) in height. When installed in exit doorways, exit doors shall be capable of opening at least 90 degrees and shall be so mounted that the clear width of the exit is not less than 32 inches (813 mm). (Sec. 1133B.2.2 and Figure 11B-33) (From Cycle 1)

43 There shall be a level and clear floor or landing on each side of a door. The level area shall have a length in the direction of door swing of at least 60 inches (1524 mm) and the length opposite the direction of door swing of 48 inches (1219 mm) as measured at right angle to the plane of the door in its closed position. (Sec. 1133B.2.4.2 and Fig. 11B-26A and B) (From Cycle 1)

44 The floor or landing shall be not more than 1/2 inch (12.7 mm) lower than the threshold of the doorway. (Sec. 1133B.2.4.1 and Figures 11B-32) (From Cycle 1)

45 The bottom 10 inches (254 mm) of all doors except automatic and sliding shall have a smooth, uninterrupted surface to allow the door to be opened by a wheelchair footrest without creating a trap or hazardous condition. Where narrow frame doors are used, a 10 inch (254 mm) high smooth panel shall be installed on the push side. (Sec. 1133B.2.6 and Fig. 11B-29) (From Cycle 1)

46 Maximum effort to operate doors shall not exceed 5 pounds (22 N) for exterior and interior doors, applied at right angles to hinged doors and at the center plane of sliding or folding doors. Compensating devices or automatic door operators may be utilized. The maximum effort to operate fire doors may be increased up to 15 pounds (66.72 N) if allowed by the appropriate administrative authority. (Sec. 1133B.2.5) (From Cycle 1)

47 Stairways shall have handrails on each side, and every stairway required to be more than 88 inches (2235 mm) in width shall be provided with not less than one intermediate handrail for each 88 inches (2235 mm) of required width. Intermediate handrails shall be spaced approximately equally across the entire width of the stairway. (Sec. 1133B.4.1.1) (From Cycle 1)

48 Stair handrails shall be 34 to 38 inches (864 to 965 mm) above the nosing of the treads. (Sec. 1133B.4.2.1 and Fig. 11B-35) (From Cycle 1)

49 Stair handrails shall extend a minimum of 12 inches (305 mm) beyond the top nosing and 12 inches (305 mm) plus the tread width beyond the bottom nosing. (Sec. 1133B.4.2.2 and Fig. 11B-35 and 11B-37) (From Cycle 1)

50 Stair handrail ends shall be returned or terminate in newel posts or safety terminals. (Sec. 1133B.4.2.3) (From Cycle 1)

51 Stair handrails projecting from a wall shall have a space of 1 1/2 inches (38 mm) between the wall and the handrail. Handrails may be located in a recess if the recess is a maximum of 3 inches (76 mm) deep and extends at least 18 inches (457 mm) above the top of the rail. (Sec. 1133B.4.2.5 and Fig. 11B-36) (From Cycle 1)

52 The handgrip portion of stair handrails shall be not less than 1 1/4 inches (32 mm) or more than 1 1/2 inches (38 mm) in cross-sectional nominal dimension or the shape shall provide an equivalent gripping surface. (Sec. 1133B.4.2.6.1) (From Cycle 1)

<input type="checkbox"/>	53	The upper approach and the lower tread of each stair shall have a clearly contrasting color strip between 2 inches (51 mm) and 4 inches (102 mm) wide parallel to and within 1 inch (25 mm) of the nosing. The strip shall be at least as slip resistant as the other treads of the stair. A painted strip is acceptable. (Sec. 1133B.4.4 and Fig. 11B-35) (From Cycle 1)
<input type="checkbox"/>	54	The stair tread nosing shall not project more than 1 1/2 inches (38 mm) past the face of the riser below. (Sec. 1133B.4.5.2 and Fig. 11B-35) (From Cycle 1)
<input type="checkbox"/>	55	Open stair risers are not permitted. (Sec. 1133B.4.5.3 and Fig. 11B-35) (From Cycle 1)
